

East Ravendale CE Primary School

Physical Education (PE) Intent Statement

Intent

Through the delivery of a high-quality PE curriculum we want all children at East Ravendale to have a positive experience of physical education which leads to a lifelong love of being active. We intend to teach children how to collaborate and cooperate with others, as part of a team, understanding resilience and fair play. We aim to enhance our pupils' experiences within a range of sports and activities and offer them opportunities to develop their skills further through links with outside organisations.

Implementation

We are a member of the local School Sports Partnership (SSP) which keeps us up to date with the latest initiatives. It is also where we access many of our competitions, festivals, CPD and support with projects geared around health and physical activity.

We have chosen to use the GetSet4PE schemes of work to build our curriculum. Our long term plans ensure progression across and between year groups, children have the opportunity to develop and build on skills previously taught, and experience a range of different sports throughout their time in our school.

A typical PE lesson follows this structure: warm up, vocabulary and teaching points (modelling) short bursts of activity to embed the teaching points and mini plenaries where assessment for learning reveals misconceptions or further challenges needed.

Impact

As a result, children at East Ravendale will be confident and competent individuals who engage in sport in their future. They will be healthy citizens with a love of physical activity and understand the benefits an active lifestyle can bring.
